There are over 100 free fraction worksheets in PDFs below to support the many concepts encountered with fractions. When starting with fractions, begin by focusing on 1/2 and then a 1/4 before moving to equivalent fractions and using the 4 operations with fractions (adding, subtracting, multiplying and dividing) These worksheets require students to find a half using circles, squares, rectangles, sets of objects e.g., one-half of 12 cookies, one-half of 14 chocolates etc. Worksheets to find 1/4 of sets and of shapes. Beginning to look at 8th's, 6th's by dividing the circle into equal parts. Eight Pizza Worksheets to show the toppings by fractional amounts. Helps to keep learning about fractions fun and authentic. Worksheets to Add Fractions with Common DenominatorsUse these worksheets before having students add fractions without finding common denominators. Additional practice. 6 Worksheets to subtract fractions with a common denominator. Students are required to find the common denominator prior to adding. These worksheets require students to take fractions like 18/12 and reduce them or simplify them to 6/4 and on to 3/2 and on to 1 1/2. Students are required to take fractions like 3/12 to 1/4. Finding equivalent fractions is key. Students need to find ways to see that 2/4 is the same as 1/2 and will benefit from having hands on activities. Worksheet for mixed fractions Tutorial included These worksheets all have a common denominator. 10 Worksheets to multiply fractions with and without common denominators. To divide the fractions, multiply the reciprocal then simplify. Change the mixed number to an improper fraction, divide using the reciprocal and simplify where you can. Use a ruler to line up the equivalencies. These worksheets help students see the connection between fractions and decimals. Can students apply what they know? Use these fraction word problem worksheets. Multiplying, Division, Addition, Subtraction etc 2 Times Tables Worksheet 1 of 5. D. Russell Print the Two Times Tables Fact Target Worksheet in PDF The target worksheets are made to look like a dartboard. The target number is two and it is in the middle of each of the target worksheets. The next ring shows what to multiply the target number, two by and the outer ring of the target is blank and it is where the answer (product) is to be written in. Learning the multiplication facts can be daunting for children and sometimes it helps to change up the process. These target worksheets change it up a bit to provide a different experience from the traditional horizontal or vertical worksheets. To ensure children today learn the multiplication facts and commit them to memory, it takes 10-15 minutes of practice three or four days per week, typically for the school year and sometimes longer. Worksheets like these need to be re-visited frequently throughout the year(s). Use an egg timer or stop watch and record how long it takes a child to complete a worksheet to gage progress. Playing beat the clock often stimulates some additional fun. 2 Times Tables Worksheet 2 of 5. D. Russell Print the Two Times Tables Fact Target Worksheet in PDF The two times tables are usually the quickest to quick to learn and to commit to memory. In fact, random facts should only be done after the child has learned the two, five, ten and squares (2 x 2, 3 x 3, 4 x 4, ...) timetables. A sequence should be followed when getting children to commit the facts to memory. For the two times tables, lots of oral skip counting helps to learn the facts. Skip counting refers to 2, 4, 6, 8, 10, 12 etc. However, when skip counting, don't always start at 2, use a variety of entry points to skip count. Take turns saying them orally, begin at various numbers. For instance, I'll say 4 and the child will say 8, I'll say 2 and the child way say 4, for every number I say, the child must provide the product by multiplying my number by two. You might also find the 100's chart useful for showing the patterns of counting by two. When using the hundred's chart, have the child shade in the multiples (2,4,6,8, 10.....) of 2. When children study grammar, one of the most basic lessons they learn involves the parts of speech. The term refers to the category to which words are assigned based on how they function in a sentence. Knowing and understanding the parts of speech help children avoid grammar errors and write more effectively. English grammar is composed of eight basic parts of speech: Nouns: Name a person, place, thing, or idea. Some examples are "dog," "cat," "table," "playground," and "freedom." Pronouns: Take the place of a noun. You might use "she" in place of "girl" or "he" instead of "Billy." Verbs: Show action or a state of being. Verbs include the words "run," "look," "sit," "am," and "is." Adjectives: Describe or modify a noun or a pronoun. Adjectives give details such as color, size, or shape. Adverbs: Describe or modify a verb, adjective, or another adverb. These words often end in "-ly," such as "quickly," "quietly," and "softly." Prepositions: Begin phrases called prepositional phrases that describe the relationship between other words in the sentence. Words such as "by," "to," and "between" are prepositions. Examples of their use in a sentence include: "The girl sat by the lake." "The boy stood between his parents." Conjunctions: Join two words or clauses. The most common conjunctions are "and," "but," and "or." Interjections: Show strong feeling. They're often followed by an exclamation point, such as "Oh!" or "Hey!" Try some fun activities with your children to help them learn to identify each part of speech. One activity could be using a different colored pencil for each part of speech and underlining them in old magazines or newspapers. Print out these parts of speech worksheets for your children to complete: Beverly Hernandez Spend some time discussing parts of speech with your students or children. Provide plenty of examples of each. Then, have students complete this parts of speech vocabulary sheet. For some enjoyable practice identifying parts of speech, pull out some of the children's favorite books and find examples of the different parts of speech. You could treat it like a scavenger hunt, searching for an example of each. Beverly Hernandez As children look for the names of the parts of speech in this word puzzle, encourage them to review the definition for each. See if they can come up with one or two examples for each part of speech as they locate its category in the puzzle. Beverly Hernandez Use this crossword puzzle as a simple, engaging activity to review the parts of speech. Each clue describes one of the eight basic categories. See if students can correctly complete the puzzle on their own. If they have trouble, they can refer to their completed vocabulary worksheet. Beverly Hernandez You can use this challenge worksheet as a simple quiz on the eight parts of speech. Each description is followed by four multiple choice options from which students can choose. Beverly Hernandez Young students can use this grammar activity to review the eight parts of speech and brush up on their alphabetizing skills. Children should write each of the terms from the word bank in alphabetical order on the blank lines provided. Beverly Hernandez In this activity, students unscramble the letters to reveal each of the eight parts of speech. If they get stuck, they can use the clues at the bottom of the page to help. Beverly Hernandez Let your students play super sleuth with this challenging secret code activity. First, they must decipher the code. Then, they can use their decoding key to identify the parts of speech. There are clues at the bottom of the page to help if they have trouble.
